Harry and others- Paragraph 39 of the order states:

Upon request by EPA, Respondent shall have an EPA-designated laboratory analyze samples submitted by EPA for QA monitoring. Upon request by EPA, Respondent shall allow EPA or its authorized representatives to take co-located samples. Respondent shall notify EPA in writing not less than 5 days in advance of any sample collection activity. EPA shall have the right to take any additional samples that EPA deems necessary.

We currently forecast completing the sampling this Thursday, Sept 20, so if EPA wants to exercise its rights to split samples under paragraph 39, this should be done in the next few days.
